Description

The F3 (or flight log) screen allows unpausing via KSPedia.

Reproduce:
1) Launch any vessel.
2) Press F3. The flight-log will open and the game will auto-pause.
3) Open KSPedia and unpause the game.
4) (optional) Close KSPedia and enjoy flying with a window in front of your craft

Expected: KSPedia shouldnÂ´t open, while the flight log is open, because the flight log blocks a big part of it anyway.

Observed: KSPedia opens, but the flight-log stays in front. Pausing/unpausing is possible using the button.

Workaround: Press F3 again. Everything should be back to normal.
