Description

Kerbal under Linux (64bit Mint), version v0.20.2.0

When attempting a fuel transfer (MOD + RIGHTCLICK on tank), and all I get is the normal dialog for the fuel tanks.

The MOD key for Linux is the RIGHTSHIFT key, which works normally for all other key bindings that use the MOD key (debug, copy, etc). It does not work for the fuel transfer operation. I have tried numerous other key combinations with any luck.

History

#1 - 06/12/2013 07:03 AM - dlmarti

- Status changed from New to Not a Bug

- Assignee set to dlmarti

- Target version set to 0.20.2

- % Done changed from 0 to 100

I was not holding down the MOD key during the double operation of clicking both tanks.

I would suggest, however, changing that part of the UI.
It is quite a deviation from expected.
