Platform:	Linux	**Mod Related:**	No
Expansion:			

Description

Kerbal launches just fine. The initial menus appear just fine. However, once I try to open any of the gray-window menus (for instance, to play a saved game) the window appears but is entirely blank. This also happens when I select 'settings' to change graphics or audio settings. The gray menu windows appear with no contents. They're entirely blank. If this issue gets picked up, I'll send screenshots.
