**Description**

I first noticed it when I named one of my ships in the VAB "mÃ¼nlander". The letter Ã¼ is way out of proportion (see screenshot). This format error is also visible in the tracking station (see screenshot). Also the letter seems to disappear when saving a subassembly (see screenshot).

1.1.3 All umlauts still have bigger letters. Absolutely not important though.

We've changed the font since then. This is most likely already fixed.
