Description

Corrupt Save When PS4 Version Crashes at a Loading Screen (Happens Mostly in the VAB/SPH or returning to Space Center)

Im having problems when the PS4 Version Crashes and when KSP crashes at loading screens 9/10 times I faced corrected Save file when restarting the game. This has caused me to play in sandbox mode only until squad fix this bug and I posted this to raise awarness that we are getting corrupted saves when the game crashes.

I don't know if this also happens on the Xbox One

Heres a reddit post from a subreddit called r/consoleksp are having similar problems.

I don't know how this bug can be replicated but playing the game on ps4 for a few hours could increase the chances of this bug happening
