Kerbal Space Program - Feedback #25553

That the KAL controller would return to the beginning of its sequence when its finished playing once

Description

What I am talking about here is if a KAL controller is set to play once.

It would be good if the sequence is complete that the KAL controller is reset to where it began its play before stopping

Proposed additional option

0 1 2 3 4 5 6 7 8 9 **0** (STOP) or 9 8 7 6 5 4 3 2 1 0 **9** (STOP)

Current Only Option

0 1 2 3 4 5 6 7 8 9 (STOP) or 9 8 7 6 5 4 3 2 1 0 (STOP)

With the current option Im stuck at the end of the run if I want to replay the sequence from the beginning at a later time which means I have to manually reset it via the action menu
