Description

Noticed this a couple of days ago. My reputation system seems to be frozen. Completing or failing contracts does not change the amount of reputation. I accessed the hidden cheats in the debug menu (holding down alt) and adding reputation. Nothing my reputation is still stuck at the same amount. No moving bar, no changing value. I will attempt to test my save file on a fresh install, and I will check another save file.

Thought I should clarify that this is the 64 bit build

So I moved the save file into a clean install, and the reputation system worked flawlessly. Not sure what is going on, but I will post another update as soon as I have more info.

- Status changed from New to Resolved

- % Done changed from 0 to 100

I am either a victim of a rare glitch, or an idiot. The reputation moved. So I have no clue if this is an isolated event, or if it ever happened and I was confused at the small distance the slider moves.
