### Description

While building spacecraft in both the spaceplane hanger and the Vehicle assembly building the game will occasionally freeze and all control of the UI will cease. The only way to continue is to dashboard out of the game and force quit KSP.

Sometimes this results in a corrupted save file.

Part count does not seem to be the reason, as I have had this occur 7-8 parts into a build.

### History

#### #1 - 10/28/2016 05:09 PM - ggargioni

on the PS4, press and hold PS button, log out user from PS4 and re-log user from PS4. Enter the game (still running) and enjoy. It is annoying, but you can continue.
