

Kerbal Space Program - Bug #13437

Binding Key kombinations with modifiers (Shift, Alt, Ctrl) doesn't work.

12/16/2016 03:22 PM - Kobymaru

Status:	New	Start date:	12/16/2016
Severity:	Normal	% Done:	0%
Assignee:			
Category:	Controls and UI		
Target version:			
Version:	1.2.2	Language:	English (US)
Platform:	Linux, Windows	Mod Related:	No
Expansion:			
Description			
When binding keys, I can bind actions to only one key.			
When I try to bind to key combinations, such as Control + W, I can only bind to either RightControl/LeftControl OR W, but not both at the same time.			
I believe such key combinations should be possible.

I wouldn't call this a bug nor as normal priority, but as feedback at low prio, because i think it's intended. On the other hand i support freedom of individual controlsettings.

To include a bug (or feedback aswell) here, i'd say that i like to use my german (international) keys like \tilde{A} , \tilde{B} , \tilde{C} or other keys ($\#$, $*$, $<$, ...) not supported anymore (pressing key, nothing is responding) (i think they all were some updates ago (1.0?)) - (but as unworthy, i adapted).
