

Kerbal Space Program - Bug #13441

Recover object from Mun surface falls through surface when approached.

12/17/2016 08:27 AM - Jonsend

Status: Confirmed	Start date: 12/17/2016
Severity: Normal	% Done: 10%
Assignee:	
Category:	
Target version:	
Version: 1.2.2	Language: English (US)
Platform: Linux, Windows	Mod Related: No
Expansion:	

Description

Windows 10 x64
KSP 1.2.2.1622 x86 (Steam)

ISSUE:

Attempting to complete mission 'Recover part KTZGF from the surface of the Mun'. Once I get withing a certain distance (approx 200m) the part falls through the surface of the Mun and keeps falling as shown in this video:

<https://youtu.be/q3nmlybomuQ>

The same happens if I switch to the part using '{' and '}' from outside the ~200m zone. An example of switching is shown in the following video:

<https://youtu.be/bFvcNNDkGzg>

HOW TO REPLICATE:

1. Unzip the attached zip file to the save folder.
2. Load the attached save.
3. From the Tracking station select the last item (Grab-bot lander MK2 probe).
4. Disable brakes and drive towards the active target.
5. When within 200m of the target the problem is seen.

History
