Description

Certain pages on KSPedia do not display all their text leaving hanging sentences on a few of the pages. The pages with incomplete text seem to differ user to user.

I can confirm this bug.

Details of my Setup:
Linux
Version 1.2.2.1622, 32bit
Maximized borderless window (commandline parameter -popupwindow)
1920x1080 Monitor
UI-Scale set at 80%

Reproduce:
Set UI-Scale to 80%
Go to KSPedia, look for unfinished sentences

Workaround:
Set UI-Scale to 100%
Set scales of UI-elements individually if necessary

Notes:
Probably the textboxes within KSPedia are getting resized, but not the text in it.
Effects depend on screen resolution or window size.
Effects seen in the screenshot:
