### Description

Upon clicking 'Quickload' the box is blank, there are no options there to pick from. quick saving appears to still work, but there is no way to access the saves. This is incredibly frustrating and disappointing.

The main save still seems to be working, but again upon trying to select a save to load in the space center or elsewhere there is no options in the box, no saves showing up to load.

Restarting, exiting to menu has no effect. Neither does creating new saves- they just don't show up :(
