#### Description

The title for the mystery goo containment unit part has a spurious space at the end. This appears to be a mistake.

The bug is on line 3918 of GameData/Squad/Localization/dictionary.cfg

```
#autoLOC_500685 = Mystery Goo™ Containment Unit\u0020
```

Should be corrected to:

```
#autoLOC_500685 = Mystery Goo™ Containment Unit
```

(I discovered this in the context of using a mod that gets a part from a vessel based on name, which broke when upgrading to 1.3.0)

#### History

That space is there to attempt to force some screen display messages to have proper formatting. We will check if it still needs to be there or not.

This appears to have been fixed as of KSP 1.7.3.

Please close.
