

## Kerbal Space Program - Bug #1642

### data not transmitting.

10/27/2013 01:41 PM - Ekareya

<b>Status:</b>	Closed	<b>Start date:</b>	10/27/2013

#### Description

if you try to send some data from a science report while the antenna is retracting, the data is lost and the transmission doesn't occur.

reproduction step:

- 1) transmit some data.
- 2) at the end of the transmission the antenna will retract ( wich i find annoying imo), that the moment you need to send an other transmission.
- 3) only one transmission should have happen.

( for the antenna if the player click extend antenna,i think it should lock the antenna open, and not close it at the end of a transmission. when your antenna is close and you transmit data, then yeah it should keep it's current behaviour)

#### History

##### #1 - 11/03/2013 01:51 PM - Kerolyov

- Status changed from New to Confirmed
- % Done changed from 0 to 10
- Platform Any added
- Platform deleted (Windows)

##### #2 - 11/29/2014 04:28 AM - MalfunctionM1Ke

This Bug occured to me too. It is very disappointing when you reach a planet with a probe only to loose some experiments to it.

A retracting antenna should put a "wait"-Signal to the experiments in the Queue that have been flagged for transmitting.

##### #3 - 07/17/2016 09:25 AM - TriggerAu

- Status changed from Confirmed to Needs Clarification
- % Done changed from 10 to 0

##### #4 - 11/11/2016 12:56 PM - sal\_vager

- Status changed from Needs Clarification to Ready to Test
- % Done changed from 0 to 80

This was fixed, the antenna will re-extend to transmit.

##### #5 - 12/03/2016 08:00 PM - JPLRepo

- Status changed from Ready to Test to Closed
- % Done changed from 80 to 100
