

Kerbal Space Program - Bug #1707

Solar charge obtainable through Eve

11/06/2013 02:08 AM - ElaborateDream

Status: Duplicate	Start date: 11/06/2013
Severity: Very Low	% Done: 100%
Assignee:	
Category: Buildings	
Target version:	
Version: 0.22	Language: English (US)
Platform: Windows	Mod Related: No
Expansion:	
Description 37* 27' 17" S 160* 54' 6" W 399m elevation Year 15, Day 342, 15hrs (on the dark side of Eve at that time) Small rover deployed on Eve, two OX 1x6 solar panels deployed, tracking Kerbol through the planet, getting 1.00 solar exposure (for 5.3ish charge). Repros through game loads, switching focus and solar panel retraction/deployment. Will keep the live repro archived. (filing under `terrain` as I think it's a light permissibility issue)
