

Kerbal Space Program - Bug #1981

Mouse scroll greatly diminished

12/17/2013 02:53 PM - obk

Description

Hi,

I've just installed 0.23, and found that scrolling the mouse wheel in KSP, either in the hangar/VAB or during flight, has had its effect dramatically reduced. e.g. what would have taken one 'click' of the mouse now takes many, many full rotations, to the point where it is hard to actually see that turning the mouse wheel actually does anything. Scrolling seems to have been reduced by a factor of... 100-1000?

History

Ah, this is actually a consequence of a fix for the mouse scroll. The mouse scroll actually works now and requires no 'hacking', thus the scale didn't need to be absurdly small in the settings. Either delete your settings.cfg or simply put it back to 1.0 in the settings screen. :) Will leave this open for now, but will mark as **Not a Bug** in 48 hours.

Thanks, that fixed it!

#3 - 12/17/2013 03:23 PM - Ted

Glad to hear. :)
