### Description

When you go into the tech tree, it always loads with the scroll bars all the way to the left and top, which puts the techs all in the bottom right, and you have to scroll to the right every time.

Try making the tech-tree visibility attempt to center the tree in the view, or at least remember the last position of the scroll bars.

I don't have this issue, Win7, 1366x768.

What platform are you on? What is your screen resolution?

#### #2 - 01/18/2014 02:10 PM - aaronburro

I'm on Win7-64bit with 1920x1200 resolution, fullscreen mode.

#### #3 - 01/19/2014 07:40 PM - TruePikachu

So everything is clear, this is a (non-bugged) screenshot from my game. I had not moved the scrollbars prior to taking the shot.

K, apparently it's not "all the way to the left and top," but it's still very inconvenient. here's what mine looks like. Either way, I always have to scroll to put it into a place where I can view the techs I'm interested in. Maybe the devs could make it remember the last position of the scrollbars so you don't have to scroll, because more than likely you'll want to go right back to that same spot.

The screenshot was apparently attached up above.

#### #5 - 01/19/2014 11:14 PM - TruePikachu

I'm not sure how practical remembering where you scrolled is, with respect to the engine. However, the default position definitely needs to be realigned for large displays.

Now I'm curious as to where it loads at the minimum possible resolution.
