

Kerbal Space Program - Bug #2711

Separate tanker ships are incorrectly co-located and explode when switched to.

Description

Win7
v0.23.5.464
no mods

In circular orbit around Moho at 40km, lander has 3 docking ports, and sits atop 3 external tanks with engines attached. I undock each, and they remain in formation. (see **screenshot300**)

I time-warp a little, and they start drifting apart (no picture). I switch-to the middle tanker and I can see the other 2 on opposite sides, 10's of meters away, and drifting farther. After I land on the planet, some time later, I can see they have drifted in to 3 orbits w/3 different heights. (see **screenshot302**)

When I switch-to one of them, they show up as if they are one spot, literally overlapping (see **screenshot303**)

and promptly explode. (see **screenshot304**)

History

#1 - 07/27/2015 05:55 PM - Squelch

- Platform Win32 added
- Platform deleted (Windows)

#2 - 07/17/2016 09:30 AM - TriggerAu

- Status changed from New to Needs Clarification

#3 - 08/09/2016 10:56 AM - TriggerAu

- Status changed from Needs Clarification to Closed
