Platform:	XBoxOne	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

Moving the joystick to pitch up results in the ship pitching down. Moving the joystick to pitch down does not make the ship pitch up, it still pitches down, which means it isn't an issue with inverted controls. I have had the same issue (but not as frequent) with the yaw controls, which caused the yaw controls to the left and the right to only allow the ship to yaw left. Today, I had both of these occurring at the same time.
