

Kerbal Space Program - Bug #28436

Unable to continue with training

08/14/2021 05:42 PM - Kn1ght13

Status:	New	Start date:	08/14/2021
Severity:	Low	% Done:	0%

Target version:			
Version:	1.8.1	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Core Game		

Description

Hello, I am playing this game for the first time in years and decided it would be a great idea to run through the training. I got to "Intermediate Construction" and I am unable to load the "Hopper." For the work around I am fine, and can place everything up until I have to place an engine. There should be the engine that is needed for the tutorial, but here we are. I included a snapshot of what I am seeing.

History

How did you get past the load screen that doesnt supply the Hopper?

Fresh install today and had the exact same issue. The Hopper doesn't exist in the latest patches. There's a similar ship we can select with a different name, forgot the exact name offhand, but almost all the build tutorials are broke at some point or another in the latest game, 1.12.2 as of this writing.

I added [#28438](#) for clarification of this issue title. Forgot to mention that here. Sorry about that.

I didn't, I did what I could without loading it but found the engine was also not there. I would then close out of that one and just go to the next training.

ahh ok

#6 - 01/30/2022 09:06 PM - awnied

Experiencing this issue in January 2022; can't continue progress on game because I can't get through this part of the tutorial.

These three issues together seem to describe the same problem:

- Issue [#28438](#) - <https://bugs.kerbalspaceprogram.com/issues/28438>
- Issue [#28436](#) - <https://bugs.kerbalspaceprogram.com/issues/28436>
- Issue [#28340](#) - <https://bugs.kerbalspaceprogram.com/issues/28340>

The missing engine issue is also covered in:

- Issue [#28573](#) - <https://bugs.kerbalspaceprogram.com/issues/28573>

- Issue #28415 - <https://bugs.kerbalspaceprogram.com/issues/28415>

I attempted the workarounds discussed in the below two threads but neither worked for me:

- <https://forum.kerbalspaceprogram.com/index.php?topic/204356-parts-not-loading-in-tutorial/&tab=comments>
- <https://forum.kerbalspaceprogram.com/index.php?topic/203608-support-3rd-tutorial-intermediate-construction-missing-hopper-vehicle/>
