Platform:	Windows	Mod Related:	No
Expansion:	Core Game		

Description

When the time comes for decoupling the lower stage, the lower stage does not properly separate from the upper stage, so the trainee is told that the ship is off course, and the training guidance ends. I used SAS Target setting the whole way up, so I don't believe it was anything I did wrong that caused this to happen. Unfortunately video and screen capturing aren't working for me, so I don't have any attachments to show.
