Category:	EVA		
Target version:			
Version:	1.12.3	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Core Game		

Description

I was trying to place a fuel duct between a monopropellant tank and a rover to fill the tanks and they're not connecting on the Mun. I tested it on Kerbin first and it worked

I do believe struts and ducts can only attach between parts of the same ship. You have to dock with other vessels before you can attach them.
