

Kerbal Space Program - Bug #28606

Stacked Work Lamps All Consumed upon Deploy

01/21/2022 08:16 PM - elteano

Status:	New	Start date:	01/21/2022
Severity:	Low	% Done:	0%
Assignee:			
Category:	Deployed Science		
Target version:			
Version:	1.12.3	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

The Work Lamp (small) item can stack twice inside a Kerbal's inventory. When clicking the Deploy button, rather than only consuming one item from the stack, both items are consumed. Only one work lamp is deployed, and when retrieving it, only one work lamp is returned. The other appears to have been consumed by the Kraken.

History

- File screenshot3.png added

Confirmed.

However it looks like the Kerbal can only hold two lamps and nothing else anyway

Work Around:

Put one lamp in each of the Kerbal's inventory slots like this screenshot, then it wont happen
