Version:	PS4 - Enhanced Edition 2021-9-24 Patch 15	**Language:**	English (US)
Platform:	PS4	**Mod Related:**	No
Expansion:	Breaking Ground, Core Game, Making History		

Description

Issue

PS4 will crash randomly to desktop whilst playing the game, this happens at least once per gameplay session.

Tried
I contacted support directly and reported this issue in a previous career where I had over 100 flights. They advised it may have been due to either:
- install problem
- save file issue
- ps4 issue

I followed the instructions given

1. Factory reset the past
2. Redownload and install game
3. Start a new career

Originally following this activity I played a new career with maybe only 1 blue screen crash in a weeks gameplay.

I noticed that the frequency of the crashes appeared to have spiked once I opened up the tech tech to I feel about level 3 or 4. This was a similar experience in my first career. Now I get the crashes every time I play. Usually on reload it will be fine. Occasionally it has to repair the save.

The most common occurrences I've had are...

1. Completing a manuever in map screen and then selecting the options menu to jump to tracking station.
2. Complete hang in the VAB, music still plays on but controls lock out eventually hitting the blue screen.

Frequency is evident through attached screenshot.

Unfortunately I have not a clue how to recreate, I believe there's a memory leak spiking the console back, even when reloading and doing the same task I've never been able to cause the crash.
