Description			
<p>Another seperate frozen application issue, this time during play itself. I was just creating a maneuver in the map view around Kerbin and systems completely frozen. Eventually this will error to home screen. Game is now again totally unplayable. I have like 86 flights in this save, and number of interstellar missions going on. Really great career but these crashes are rendering game totally unplayable</p>

Same issue again, setting up a new maneuver node on an orbit round eve. Screen frozen completely. Can return to ps4 main menu but the game is non responsive. Eventually it will crash out with the blue screen error. Wish you guys would give me some help, happy to install something if you want to try and capture what's going on. Most nights now at minimum I get 2 blue screen crashes.
