

Kerbal Space Program - Bug #28686

Gray screen on launcher when trying to open KSP.

01/15/2023 08:36 AM - BlueGhost

Status:	New	Start date:	01/15/2023
Severity:	Low	% Done:	0%
Assignee:			
Category:	Launcher		
Target version:	1.12.5		
Version:	1.12.5	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:	Core Game		

Description

Gray screen on launcher when trying to open KSP.

Steps to Replicate:

- 1) Open KSP from ether epics launcher or from desktop icon
- 2) Observe.

That's all i did for steps.

Expected: The launcher should be visible until i turn on the game.

Result/Observed: 2 seconds after i see library on private launcher, whole launcher turns gray and is still interactable but pressing that invisible play button on KSP doesn't seem to open the game but i can still minimize/close the window.

Fixes/Workarounds:

- Click play on KSP before the launcher turns gray.

Notes:

This happens on both login-in screen and in library.
I tried clean boot and re-installation of my drivers.
