<b>Description</b>			
Problem:			
<ul style="list-style-type: none"><li>- As per attached screenshot. Graphical errors present themselves when in windowed mode. Game continues to run normally otherwise (sound, physics etc)</li><li>- Only occurs as captured in windowed mode, I have not seen similar issues when fullscreen to any extent</li><li>- Only occurring since 0.18.4 release</li><li>- Problem resolves once switched back to fullscreen.</li></ul>			

#### History

##### #1 - 03/14/2013 03:35 PM - Anonymous

- Version set to 0.18.4

If I'm correct this issue should also resolve itself if you minimise or restart the game, correct?

I haven't explored the bounds of this bug enough to verify more specifics and situations.

To date I have only been set on full-screen and with the matching resolution of my monitor; I have not done due diligence to see if starting in windowed mode would replicate, or changing the resolution to a lower setting.

Once I have done further research I will add more detail here!

##### #3 - 03/24/2013 07:28 AM - sal\_vager

- Severity changed from Low to Petty

- Platform Windows added

This is probably graphics card dependent to a degree, but many games will fail if forced switched between fullscreen and windowed.

##### #4 - 08/16/2013 11:31 AM - Ted

- Category set to 30

- Severity changed from Petty to Very Low

##### #5 - 10/25/2013 05:53 PM - sr

Is this still an issue with 0.22? If so, what graphics card and driver are you using?

##### #6 - 11/19/2013 12:42 PM - sr

Closing due to inactivity. If you find this still to be an issue, please re-open the issue.

##### #7 - 11/19/2013 12:43 PM - sr
