

Kerbal Space Program - Bug #505

KSP.x86_64 crashes when too many parts are installed

03/30/2013 08:13 AM - Morningsong

Expansion:			

Description

The 64-bit linux version of Kerbal Space program crashes on my system when I have too many add-on parts (easily achieved by installing both the Kw rocketry and NovaPunch remix addons to an entirely vanilla installation).

It will get some ways into the loading screen, then drop back to the desktop with a SIGABRT--the log file would seem to indicate it's having trouble during texture uploads. This is an entirely reproducible crash on my system as well--it will always crash at the same point in the part load order, and removing the part it crashes on just makes it crash at a later part.

However, it does not crash when one pack is installed without the other, or when I use the 32-bit executable with both packs installed.

History

#1 - 06/10/2014 07:01 PM - AndrolGenhald

- File KSP.log added

Same issue, 32 bit works 64 bit doesn't. Always crashes while loading textures.

#2 - 06/19/2014 05:50 AM - kruppm

Having the same Problem here on 0.23.5.

#3 - 07/17/2016 09:23 AM - TriggerAu

- Status changed from New to Needs Clarification

#4 - 08/07/2016 11:33 AM - TriggerAu

- Status changed from Needs Clarification to Closed

- % Done changed from 0 to 100

Closing this report out for now. If you find it is still occurring in the latest version of KSP please open a new report (and this one can be linked to it.) For best results, the wiki contains really useful info for when creating a report <http://bugs.kerbalspaceprogram.com/projects/ksp/wiki>.

You can also ask questions about the bug cleanup in the forum here:

<http://forum.kerbalspaceprogram.com/index.php?/topic/143980-time-to-clean-up-the-bug-tracker/> and tag @TriggerAu to get my attention
