Description

In flight mode sometimes the part detail (as shown by right click) will get stuck visible for one or more parts. You don't have to open the properties manually to cause the bug to occur (the various battery packs are showing properties never requested).

In your screenshot, you have the resources list open and the "check mark" next to electric charge is selected. Did you click on it, perhaps accidentally? Because this seems like correct behavior.

- Status changed from New to Duplicate

- % Done changed from 0 to 100

That must be it! Glad I had a screenshot.
