### Description

Recently, KSP started crashing when I paused the game for any amount of time (ESC) when taking off, in orbit, etc.  This issue has occurred three times.  One of the error reports states:

"Error occurred at 2013-04-03_150344.
c:\Program Files (x86)\Steam\steamapps\common\Kerbal Space Program\KSP.exe, run by [My Computer's Name].
64% memory in use.
0 MB physical memory [2152 MB free].
0 MB paging file [0 MB free].
0 MB user address space [1761 MB free].
Read from location 000001f0 caused an access violation."

It may be relevant to note that I bought KSP via Steam.

### History
