Description

What happens:

After creating an issue in Bug Tracker, I am unable to edit the original post.

How to reproduce:

*Go to KSP Bug Tracker.

*Create a New Issue.

*Click "Update".

*There should be no options to change the version, text, etc.

Notes:

*I've been asked to edit another one of my issues, but I can't because of this "bug".

*It's an issue with permissions; I checked on the Redmine guide.
