Description
I often cannot select a target on map view. I click everywhere, with every button, but to no avail.
I found this thread discussing it: http://forum.kerbalspaceprogram.com/archive/index.php/t-25078.html
but I didn't see an answer there, nor a bug listed here, so I decided to submit it.
You can view my log at: http://justpaste.it/2opf</a
Running Mac OS X and 0.19.1.
