Target version:			
Version:	0.20	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:			

Description

Launch Stability Enhancer appears randomly in-flight and grabs my ship, explodes, and sends the ship into a not recoverable spin.

I believe that this bug originates from the use of the Lazor plugin and does not occur in stock KSP.

Additionally, please provide as much detail as possible in your bug reports. The following guide is an excellent one to follow:
