

Kerbal Space Program - Bug #8191

Cannot attach anything to Delta-Deluxe Winglet

04/02/2016 03:12 PM - biohazard15

Status:	Closed	Start date:	04/02/2016

Description

In 1.0.5, it is possible to attach other parts to Delta-Deluxe Winglet (creating a T-tail, for example). This isn't working anymore in 1.1. Crafts and subassemblies from 1.0.5 that use this can be exported to 1.1 and work fine. Compare this to FAT-455 tail - you can attach parts to it in both 1.0.5 and 1.1.

KSP version: 1.1.0.1183.

- Status changed from New to Needs Clarification

#2 - 07/28/2016 06:13 PM - bewing

You can't attach anything to any control surface other than the FAT455 tail. You can use the offset tool to accomplish a similar effect as a workaround.
