

Kerbal Space Program - Bug #8914

Highlighted parts that had action groups removed still are highlighted

<b>Description</b>			
When deleting action commands from an action group, the parts that highlight when you mouse-over the label remain highlighted, even after the action was deleted. The highlight goes away after highlighting the part.			
To reproduce:			
<ol style="list-style-type: none"><li>1. Add a bunch of parts' actions to an action group.</li><li>2. Delete all the actions.</li><li>3. The parts in the editor are still highlighted until you mouse-over them.</li></ol>

Some clarification on "deleting all the actions":

If you go to the top-most part in the menu, and click the button to clear the action without moving the mouse, the illuminated parts do not get updated (they get stuck having the cyan glow). This resets after you move the mouse and actually highlight them in the editor.
