

Kerbal Space Program - Bug #9343

LY-01 landing gear jittery when attached to Science Jr

04/20/2016 09:32 AM - 5thHorseman

Status:	Needs Clarification	Start date:	04/20/2016
Severity:	Low	% Done:	0%
Assignee:			
Category:	Parts		
Target version:			
Version:	1.1.0	Language:	English (US)
Platform:	Windows	Mod Related:	No
Expansion:			

Description

This is the same problem as prerelease bugs #8296 and #7625, but only happens when the LY-01 gear is attached directly to a Science Jr. I couldn't get it to happen to any other part. The Science Jr. was sideways in the default configuration of the SPH.

Attached is a save file with a single ship that experiences the problem, on the runway.
Attached also is the log from the run.
