Description			
Hi,			
After installing pulseaudio i was able to start the game once, played with it a hour or so. Since then every attempt to start it ends with the X crashing.			
The game was freshly extracted from the zip file, no mods, no changes in the config files.			
Relevant part from .xsession-errors:

As my master commands.

All of these are as they came with the game, i have not touched them.
