Kerbal Space Program - Bug #9464

Flags on MkI cockpit allow you to see through the cockpit

04/24/2016 10:55 AM - Katateochi

Status:	Duplicate		**Start date:**	04/24/2016
Severity:	Normal		**% Done:**	100%
Assignee:				
Category:	Parts			
Target version:				
Version:	1.1.0		**Language:**	English (US)
Platform:	Windows		**Mod Related:**	No
Expansion:				

Description

In build 1230 on win7 x64:
If you mouse over (or select the MKI cockpit in action group edit mode) the default flag becomes transparent allowing you to see through the cockpit

Steps to repeat;
- create new craft in SPH
- select MKI cockpit
- position camera side on put slightly angled back (see pic)
- mouse over the cockpit
result: you can see through the cockpit
 SIi5KTel.jpg

- Does not seem to happen with command pods.
- is also apparent in flight
- have not tested with other flags - will update when I do.

- File KSP_x64 2016-04-24 13-06-01-40.jpg added

- This also applies to the MKI inline and MKII inline cockpits. cannot make this happen with the MkII
- Only apparent on flags with transparency
- camera angle is a factor. when perpendicular to the cockpit you won't see it, camera needs slightly in front of the cockpit and looking back (as in the above pic). however the reverse is the case for the MKII inline, then the camera needs to be slightly behind it looking forward.

In pics 2 and 3 the MKII inline is the root part. If you mouse over it while the camera is angled backwards (as in pic 2) the effect is visible on the MKIs, if the camera is angle forward (as in pic 3) and mouse of the the root, the effect is only visible on the MKII.
