

Kerbal Space Program - Bug #10016

Pitch Yaw and Roll "auto-disable" when I input W, A, S, or D

Description

When I input W, A, S, or D the Pitch Yaw and Roll options in the actuation toggler are automatically disabled. When I let go of any of the keys they go back to the on position. It is only when I input either W A S or D. So during my flight I get no RCS control. It is specifically Vernor Engines that I'm having this problem with and it's getting very annoying.

History

#1 - 06/22/2016 11:20 PM - chippy

It is also bugged with regular RCS ports, not just vernor engines.

#2 - 06/23/2016 09:21 AM - sal_vager

- Status changed from New to Need More Info

- Severity changed from Normal to Low

Hello Chippy, I cannot reproduce this issue, please provide your logs, dxdiag, settings.cfg and save file, thank you.

#3 - 07/17/2016 09:58 AM - TriggerAu

- Status changed from Need More Info to Needs Clarification

#4 - 07/26/2016 05:56 AM - bewing

I can't reproduce it either.

#5 - 08/09/2019 10:28 PM - chris.fulton

- Status changed from Needs Clarification to Resolved

- % Done changed from 0 to 100

#6 - 08/09/2019 10:28 PM - chris.fulton

- Status changed from Resolved to Closed

Closing, QA has not been able to reproduce this issue for some time and in effort of the database cleanup that is underway this bug is being closed.
