#### Description

I wish you could set the landing gear steer axis to the trigger as you can do with Yaw controls when activating Advanced Flight Mode (<Modifier> + <Y>) - Since when you activate the Advanced Flight Mode you can Yaw using RT and LT (R2 and L2 for PS4?) but the landing gear steering controls are still on the Left Stick (together with roll controls)

#### History

I believe the priority should be lowered. Sorry for the overrated priority again, this was one of the first bugs I've reported.
