

Kerbal Space Program - Bug #10158

Retractable radiators don't rotate/offset around center

07/21/2016 04:31 PM - Avera9eJoe

Status: Confirmed	Start date: 07/21/2016
Severity: Very Low	% Done: 10%

Target version:	
Version: 1.3.0	Language: English (US)
Platform: Windows	Mod Related: No
Expansion:	

Description

When snapping the large and small retractable radiators to the grid, they don't align properly. Also if you rotate them they rotate around a point that isn't centered with the part model. These are both easily noticeable when placing them on lbeams. I've noticed this bug ever since they were added.

1. Place a retractable radiator on an lbeam
2. Rotate and offset (Absolute offset, not local) the radiator and watch how it doesn't rotate around its center and how it offsets unaligned to the grid.

- Status changed from New to Confirmed

- % Done changed from 0 to 10

It's always best to include a picture. And it's not the large radiator, it's the medium-sized one.

This is only a visual issue, and has no effect on gameplay, so that makes it Very Low priority, according to the priority chart. It's up to the devs as to which bug reports they choose to fix on any particular day, so there is no knowing when they might choose to fix this one.

That makes sense, sadly. Many thanks for the picture Bewing, I wasn't able to add one at the time. It seems as though many other parts from this time have off-centered models as well, namely the medium ore tank and converter, as well as the Communotron DTS-M1 antenna.
