#### Description

When in Sandbox mode, all the probe cores appear to have the full range of SAS modes even though the part descriptions say they don't, and non-pilot kerbals have all SAS modes available as well. I assume the kerbals are intentional, but I don't think the probes are supposed to do that.

No that's actually expected, it'd be a bug if they were not working in sandbox.

- % Done changed from 100 to 0

It would be good though, changing to a feedback item :)
