

Kerbal Space Program - Bug #12461

Engine sound is missing/mismatches fuel flow events.

Expansion:			

Description

Build 01540 (today's).

Effect: vessel flies with no sound and/or unjustified sound.

Expected: engine sounds when on, stays silent when off.

HOW TO REPRODUCE:

- 1) Build any craft. I used Mk1 + FL-T400 + LV-T45
- 2) Launch the craft.
- 3) While the craft is flying right-click the fuel tank
- 4) Forbid fuel usage (green triangle) OR oxydizer usage.
- 5) Allow fuel usage (or oxydizer usage).

EFFECT: engine makes the 'SRB burned out' sound and then continues in silence.

Once I even managed to press X and then Z after the sequence above and then engine still did not do sounds. But I can not reproduce that anymore.

History

#1 - 06/09/2020 06:59 AM - RafaHdz

- Status changed from New to Confirmed

- % Done changed from 0 to 10

Confirmed in latest build (2883). When fuel or oxidizer are cut off and then connected back, the engine fires up but there's no sound. Watch video for example.
