History

#1 - 10/12/2016 06:10 AM - Hikikomori

Debug menu now opens by Ctrl+Alt+F12

#2 - 10/12/2016 07:31 AM - Lysius

RightShift+F12 on Linux (Ctrl+Alt+F12 will switch you to the 12th virtual terminal, btw).

Please could you attach your settings file to this issue so we can check the bindings?

I notice that you have a Razer Deathstalker keyboard, could you please check Razer Synapse configuration, particularly game detection and key mapping for conflicts around F12?

The key combo has not changed and remains as Alt+F12 on Windows
