Description

Like topic.

- I have problems to reread/find old made issues.
- I cannot find issues i posted on (not started).
- Even own started issues are gone off list of "My Issues - Author"
- "My Issues" don't make sence, because of "No data to display"
- A tab of "watched issues" would make sence

Maybe crossrelated points, but pls. do improvement.

I like to add, it would be useful to know why watched, started or posted on issues are gone off the list.
