

Kerbal Space Program - Bug #15648

"Landing Struts" and "Auto Strut" Setting

07/09/2017 04:27 AM - GorillaGorillaGorilla

Status: New	Start date: 07/09/2017
Severity: Low	% Done: 0%
Assignee:	
Category: Parts	
Target version:	
Version: 1.3.0	Language: English (US)
Platform: OSX	Mod Related: No
Expansion:	

Description

Reproduction:

1. Run KSP Japanese version.
2. Go to "スタートゲーム"(Start Game) and start "サンドボックス"(Sandbox)
3. Go to VAB
4. Place Mk1 Command Pod and FL-T400 Fuel Tank
5. Put LT-1 Landing Struts, LT-05 Micro Landing Strut and LT-2 Landing Strut on Tank
6. Right Click any landing struts.
7. Auto Strut setting is "heaviest part" and can't be changed.
