Description

Hey guys, I'm continuously crashing for no absolute reason. Whenever I run x64, it just says "stopped working" for a couple of seconds. Same thing when I run x32.

Here's the log. <https://pastebin.com/3ACK0wdi>

2 big problems with this bug report.

- 1 you're using ksp 1.2.9 not 1.3.0
- 2 the log you uploaded was a tiny portion of the full log (don't use pastebin, instead upload the whole file to dropbox)

- Status changed from New to Moot
