Could you please delete any folders, other than "banners", in the Training and Scenarios folders found in "saves". Sometimes a version incompatibility will cause the missions not to show up if the player has started them in a previous version.

I deleted all files from saves\scenarios and saves\training except for the directories banners and their content. There were still no training missions available. Then I restored the .sfs files and the training missions were available again and working.

This ticket can be closed. I will open a new one.
