

Kerbal Space Program - Bug #1594

The letter Ä¼ seems to have format errors

Target version:	1.7.2		
Version:	0.22	Language:	English (US)
Platform:	Win32	Mod Related:	No
Expansion:			

Description

I first noticed it when I named one of my ships in the VAB "mÄ¼nlander". The letter Ä¼ is way out of proportion (see screenshot). This format error is also visible in the tracking station (see screenshot). Also the letter seems to disappear when saving a subassembly (see screenshot).

1.1.3 All umlauts still have bigger letters. Absolutely not important though.

We've changed the font since then. This is most likely already fixed.
