

Kerbal Space Program - Bug #1597

Updating to 0.22 makes training and scenario missions disappear

10/21/2013 11:23 AM - Crush

Status:	Closed	Start date:	10/21/2013
Severity:	Normal	% Done:	100%

Target version:			
Version:	0.22	Language:	English (US)
Platform:	Any	Mod Related:	No
Expansion:			

Description

I played the training missions in an earlier version and updated to 0.22 via Steam auto-update.

After the update no training missions were available when launching the game and going to "Start Game" -> "Training"

After I deleted the following directories, the training missions were available again:

```
saves\training\A_VesselConstruction
saves\training\B_flightBasics
saves\training\C_Orbit101
saves\training\D_MunFlight1
```

Expected behavior:

When an update breaks compatibility to the training persistence files, the new version should either ignore the old files or they should be deleted during the update.
